**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C 121:
  - Group I, claims 1-14, drawn to structure of a catheter, Classified in class 604, subclass 272
  - Group II, claims 15-20, drawn to a method of use of any catheter, Classified in class 604, subclass 272

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case The author has not specified the type of catheter the method described in Group II can be utilized in, which means the method described can be utilized in any apparatus with a tube for insertion into a bodily passage. The catheter described in Group I consists of a cylindral body with a locking mechanism, and a pointed end, non of which have been described in Group II claims. This renders Group I and Group II, two independent claim restriction for examination purposes as indicated is proper.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3763

4. A telephone call was made to Mr. Mattson on 1/15/02 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
